Unique style draws me in, the cigs a representation of bad habits, and the "coolness" of this piece is off the charts. Grateful for this Tweak and his art style.

-Antiflux gives me the distinct feeling that an anime artist watched the pink elephant scene from Dumbo and then decided to do a portrait. The entire RADII8 collection is beautifully done but this one just hits different.

-The first thing that caught my attention about this piece was the sense of action. If you've been accosted by powerful winds at least once in your life, you know the feeling. This piece blends that sense of freshness with the chaos of a windy day.

-FireLord has created some awesome work. This piece in particular caught my attention because of the high contrast between the lights and darks. My first thought was the Studio Ghibli film Howl's Moving Castle. The figure seen above is off to begin another day full of magic :)

-While the image pictured here is only a single frame in this wonderful GIF created by Jen, it helps give an idea of the beauty of the work. This was the original piece that attracted me to Jen's work and just makes me want to sip some tea in a window nook on a rainy day.

-The beauty of digital art is that you never know what you'll come across next. This piece by @nouseskou for Fellowship caught my attention because it perfectly highlights the intersection of nature, art, and tech.

## WITCHCRAFT

Moonlight Bathing

People have always been drawn to myths, folklore, and esoteric practices-- not because they literally believe in them, but because they speak to something older than logic. These stories echo ancient ways of understanding the world, when symbols explained what words and science could not.

Long before organized religion, myths and rituals helped us make sense of nature, death, love, illness, and dreams-- mysteries we still struggle to grasp. Passed down through generations as emotional maps and shared truths, they remain relevant. And even now, in our rational world, the hunger for meaning persists.

Many don't live as witches but still burn herbs, read horoscopes, or feel drawn to the moon-- not out of literal belief, but because these practices tap into universal symbols and themes that resonate deeply. Psychologist Carl Jung called such symbols archetypes-- figures like the Wise Woman, the Trickster, or the Witch -- that appear across cultures and reflect parts of our inner selves.

celebrated, honored the seasons, and carried out simple habits. That atmosphere soaked into me early, and I think it never left.

My art explores the unseen, the emotional, spiritual, and symbolic. I chase feelings and truths just out of reach. The dreamlike and mystical often feel more honest than the literal. That's where I belong.

Each piece tells its own story and carries its own energy, soft or sharp, silent or humming with ancient noise, but all come from a place where power and tenderness meet.

Myth and witchcraft offer space for intuition, mystery, and emotion, things our modern lives often overlook. They help us feel connected: to nature, to each other, and to something beyond.

Even without belief, the pull remains, not for factual truth, but for something deeper: emotional, mythical, soul truth.

I grew up in a small town in the Slavic lands, close to nature, where folklore wasn't just stories. Rituals, old beliefs, and quiet superstitions shaped daily life, how people c

Fertility Ritual

Witchcraft isn't about casting spells. It is the spell, a call to return to yourself, wilder and wiser, in all your light and dark.

This collection is a series of 1/1 digital collages rich in visual storytelling, reflecting ancient rituals and timeless rites that connect us to the unseen world.

# THE TWISTED TWEAKS

Tweaks are the digital, artistic representation of many internal struggles humans face. The anxieties and complex emotions that people feel every day should no longer be looked down on, rather accepted and loved because that makes you who you are.
